i3 INTERNATIONAL | INTELLIGENT VIDEO DRIVING PROFIT

Cut costs, boost sales, and effectively manage risk factors. Ensure your business remains safe, secure, and thriving!

Enhance your video system

Elevate your current camera solution with Ai and POS integration. Enhance asset, staff, customer, and food safety by optimizing visibility and centralizing security across all restaurant locations.

See the whole picture

Get complete coverage with our 360° IP cameras, eradicating blind spots inside and outside your store. When paired with our AI solution, gain valuable insights into the entire customer journey.

Secure reliable cloud connection

Connect securely and remotely to i3's cloud platform using outbound ports, ensuring both easy and secure access to sensitive data.

POS integration Solution

Utilize i3's data analytics to monitor every transaction, enabling quick sorting and searching of data. Receive real-time alerts for fraud or suspicious behavior, significantly reducing shrinkage and minimizing the resources needed to identify fraud effectively.

Long term cloud storage

With i3's cloud storage, users can securely store years of video footage, avoiding challenges related to liability by ensuring the availability of relevant videos. Retrieving these videos is swift and convenient, allowing remote access from any PC and enabling direct sharing with your insurer.
