

i3's CMS Smart-ER

A smarter way of identifying and investigating risk using enhanced Exception Based Reports (EBR)

- ✓ POS integration to reduce theft
- ✓ Ai & machine learning give live data analytics
- ✓ Deliver real-time actionable data to your location

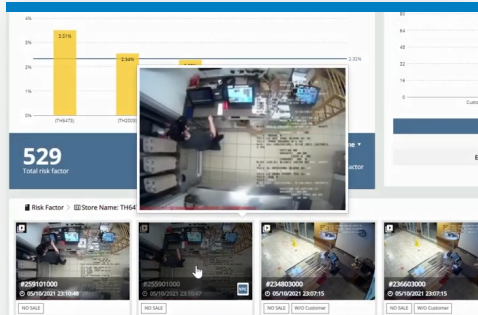

Find and action exceptions in a few clicks!

Identify and address exceptions effortlessly with just a few clicks!

Explore high-risk locations and employees through interactive graphs.

Analyze risk factors calculated from data collected across multiple locations or specific employees within a single location. Streamline your decision-making process with our intuitive interface.

Take the action necessary to protect your bottom-line right-away!

Protect your bottom line immediately by taking swift action!

Assess exception severity by drilling down to the transaction level and reviewing the corresponding video footage. Make informed decisions to safeguard your business effectively.

Stop small theft before it turns into a large fraud

Prevent small theft from escalating into a major fraud with Smart-ER.

Receive real-time alerts if the following incidents occur at your location:

A transaction happens without a customer present or when there are customers without transactions.

Transactions meet specific criteria like voids, discounts, overwrites, etc.

Stay ahead of potential issues and protect your business effectively.

Smart-ER, an intuitive module within CMS, empowers you to optimize your video surveillance system, functioning seamlessly as an extension of your LP/AP team.
