

# **IMMEDIATE • ACCURATE • PRECISE** i3 Artificial Intelligence

i3 offers intelligent, innovative, and integrated Ai-powered video solutions along with secure cloud services, enabling organizations to operate in safer and more profitable environments. We prioritize both security and simplicity, understanding the delicate balance between the two.

At i3, we are industry leaders in cloud security, video analytics, data analytics, and POS exception-based software. Our clientele includes a diverse range of retailers, quick-service restaurants, commercial enterprises, and government organizations.

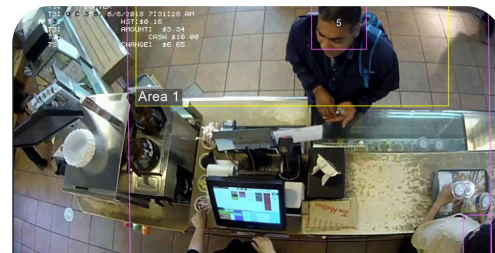

## Heat Mapping

Enhance your customer experience by identifying store hotspots and optimizing high-traffic areas. Implement strategic product placements to drive impulse purchases and elevate customer satisfaction.

## Feature Search

Our advanced search solution recognizes color, object types, and facial features, enabling swift retrieval of incidents from large video archives. This not only saves time but also reduces costs significantly, providing efficient solutions for our users.

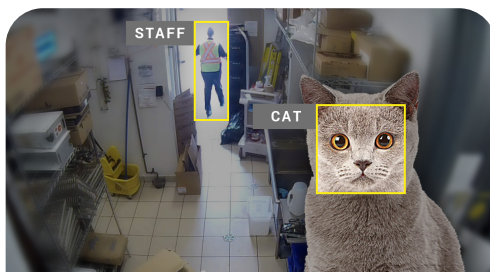

## Stop Till Manipulation

Through the combination of video, i3Ai, and POS integration, you receive real-time alerts regarding instances of cash theft or sweet-hearting at the register, enhancing your store's security and operational efficiency.

## Minimize Customer Wait Time

i3Ai solution precisely measures in-store queue times across diverse industries such as QSR, C-store, Specialty Retail, and Grocery. Let us assist you in gaining a comprehensive perspective.

## Reduce False Alarm

Businesses and facilities can enhance their security by pairing i3Ai with their perimeter protection solution. This integration allows filtering out non-human triggers, significantly reducing false alarms and ensuring more accurate threat detection.

## Real-time Detection

i3Ai solutions, when integrated with CMS and Alert Center, empower your security associates to swiftly detect and respond to suspicious events such as loitering, blocked exits, unwanted vehicles, and suspicious activities within your facility in real time.

These services are available via our award winning **Ai-cloud**, leveraging the power of cost-effective offsite servers to get full access to **i3Ai**.
