

INTELLIGENT VIDEO DRIVING PROFIT

# i3's Smart Video Solutions

## Protect, Monitor and Report.

Manage the security of your facility, and achieve peace of mind knowing your space is always being monitored with i3's Ai enhanced holistic video solutions.

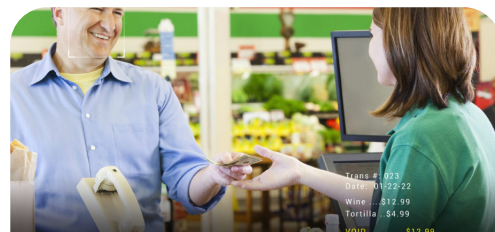

### Enhanced Security with Ai

i3Ai enhances any standard video security system, creating a centralized hub for actionable data. When combined with POS data, this Ai solution effectively reduces internal fraud, ensuring the organization meets its operational goals.

### Platform ease of use

Utilize i3's distinctive Ai solution to improve customer service, support employees, enhance overall experiences, and optimize customer interactions through real-time alerting.

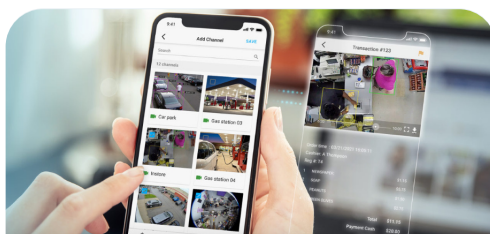

### Exception based reporting

i3Ai streamlines transaction monitoring, data sorting, and video review, enhancing incident analysis, reducing shrinkage, and minimizing fraud detection resource requirements.

### Encrypted video transfer

Securely connect to i3's cloud platform via outbound ports, simplifying access to sensitive data. Effortlessly transfer large video files to insurers for your Risk Department, ensuring smooth operations with minimal effort.

### Business intelligence tools

By integrating your existing video with i3Ai and data analytics software, i3 can deliver comprehensive reports to your organization, empowering you to make informed, proactive decisions regarding your operations.

### Administration control

i3Ai promotes proactive safety measures, fostering better communication among students, teachers, parents, and administrators. Administrators maintain full user control within this comprehensive system.

These services are available via our award winning **Ai-cloud**, leveraging the power of cost-effective offsite servers to get full access to **i3Ai**.
